SUMMARY

Passionate front-end web developer with experience in providing quality services in a team-oriented environment. Eager to apply recent Front-End Development education and problem-solving, web design, and collaboration skills to create a technological impact within the tech industry. Seeking to use my skills to create functioning software for a company.

KEY SKILLS

Technical Skills: CSS, HTML, JavaScript, C#, VSCode, Git, GitHub, GitBash

Key Professional Skills: Debugging, Teamwork, Communication, Collaboration, Adaptability, Problem-Solving, Empathy, Public Speaking, Attention to Detail

TECHNICAL EDUCATION

Front-End Web Development Certificate (Hands-On, Project-Based Training)   **Received: July 2022**
Kenzie Academy from Southern New Hampshire University, *Indianapolis, IN (remote)*
- Gained proficiency with how JavaScript, HTML, and CSS work together in a 6-month program to help create innovative website layouts that would be useful in a front-end web development environment.

SELECTED TECHNICAL PROJECTS

Jeopardy Quiz Game (Capstone) | JavaScript, HTML, CSS | GitHub URL   **July - August 2022**
- Used Javascript to fetch questions and their respective answers from an api to replicate a jeopardy game on the web.
- Applied CSS to ensure the look and feel of the game would be as close if not similar to the popular game show.
- Engineered a point-based system to show player progress using rules by the authentic game to fully immerse the player.

Movie Catalog From 2001-2004 | JavaScript, HTML, CSS | GitHub URL   **July 2022**
- Created a large array consisting of two separate API's in order to include both a description and year for each title for easy access.
- Used Javascript to display and filter through each film title to show an image, description, year, genre, and cast member in every showcase.
- Included CSS to format each movie to ensure consistent readability.

Datatypes Text Recognition Analyzer | JavaScript, CSS | GitHub URL   **June 2022**
- Developed JavaScript code that analyzes imputed text to efficiently receive user input data.
- Created and rendered information on the website page to correctly demonstrate wanted text for better user experience.
- Generated clean and understandable code using Object-Oriented Programming to improve readability and easy accessibility.

Maze Nested Arrays Assessment | JavaScript, CSS, HTML | GitHub URL   **May 2022**
- Successfully developed player image in JavaScript to improve user experience through traversing the maze.
- Created routes to allow movement into allowed areas to ensure the program runs smoothly and as intended.
- Rendered pathways, end and starting sections to allow users to have absolute control over actions while making sure no issues are created.
- Designed visuals of maze to distinguish between walls and walkable spaces to allow users to complete the maze.

WORK EXPERIENCE

Fulfillment Center Associate - Stower, Picker, Decanter, Water Spider   **April 2021 – October 2022**
Amazon, *Moreno Valley, CA*
- Consistently meet and occasionally exceed department goals by stacking 100+ items per shift to efficiently secure production expectations were met
